Notice of Price Revision

Dear customers,

We are pleased to hear that your company continues to prosper.

We sincerely thank you for your continued support and patronage.

We wish to inform you that we will be implementing a price revision for our products, which you have kindly supported, as detailed below.

Currently, material and component prices are rising, and utility costs are increasing. We have reviewed all expenses and worked diligently to reduce costs.

However, there are limits to what we can absorb through our own efforts alone.

It has become difficult to maintain our services at the same prices as before, and we have no choice but to implement a price revision.

The details are as follows. We kindly ask for your understanding.

Sincerely,

Notice

1. Items Affected: Birefringence and Photoelasticity Constant Measurement Services
2. Price Revision Rate: As per the attached document
3. Effective Date: Effective for quotations submitted from January 2026
